### ***HOTMIX ASPHALT WORK DEPLOYMENT METHOD ON THE HOTMIX RASUNA SAID ROAD WORK PROJECT IN 2023***

*Practitioners take part in professional work at the Jalan Rasuna Said project, DKI Jakarta. The aim of this professional work is to train critical thinking skills in dealing with various problems in the field, improve analytical skills, and understand work methods, especially those related to the topic chosen by the intern. The focus of the discussion by the Practitioner was on the method of deploying hotmix asphalt on Jalan Rasuna Said. Practitioners review the implementation stages which include preparatory work, asphalt coating and finishing. During implementation, of course there are obstacles that need to be overcome so that the project can run smoothly. This activity aims to ensure that the methods and stages of work carried out in the field are in accordance with the established standard plans and specifications.*
