ANALISIS DAN VISUALISASI DATA SDM IPTEK DAN KONTRIBUSI IPTEK,RISET, DAN INOVASI PADA INSTANSI BRIN

The National Research and Innovation Agency (BRIN) is a non-ministerial government institution that carries out research, development, study and application, as well as discovery and innovation. The National Research and Innovation Agency (BRIN) has several sections or divisions, one of which is the Deputy for Research and Innovation Policy. Currently the Deputy for Research and Innovation Policy (DKRI) is concentrating on digital media to ensure that information services can be accessed by the entire community. The new Deputy for Research and Innovation Policy (DKRI) manages the dashboard and also displays IIRI data (Indonesian Research and Innovation Science and Technology Indicators) which will later be displayed on the website. Displays IIRI data (National Research and Innovation Science and Technology Indicators) to find out the annual data produced. Therefore, there is an innovation, namely data visualization using the Tableau tool in the form of displaying data in various graphs to make it easier to read IIRI (National Research and Innovation Science and Technology Indicators) data.

Keywords*: DKRI, IIRI, Tableau*
