INVENTORY MANAGEMENT AT SHOE IMPORTER COMPANY: PT XYZ

This professional work report is titled "Inventory Management at Shoe Importer Company PT XYZ" and aims to analyze and evaluate the inventory management system implemented by PT XYZ, a shoe importer company in Indonesia. During the internship period, the student conducted observations, collected data, and interviewed staff to understand the ongoing inventory management processes.

The analysis results indicate that PT XYZ has implemented several effective inventory management strategies; however, there are some challenges that need to be addressed, such as inventory data accuracy and responsiveness to demand fluctuations. These findings suggest the need for improvements in the inventory control system to enhance operational efficiency.

The recommendations generated from this report include integrating more advanced information technology for inventory data management and providing training for employees in proper inventory management practices. With the implementation of these recommendations, it is expected that PT XYZ can improve operational effectiveness, reduce costs, and enhance customer satisfaction.

Keywords: *inventory management, importer company, shoes, efficiency, information technology.*
