THE PROCESS OF PREPARING CLIENT FINANCIAL STATEMENTS AT PT WIDUA TATA KONSULTAMA

This report presents the results of the Professional Work program implemented at PT Widua Tata Konsultama for 2 months, focusing on the analysis of financial statements and understanding of work procedures applied in the company. The main purpose of this internship is to apply the theories learned in college into real practice in the world of work. During Professional Work, Practice is involved in a variety of activities, including the collection and analysis of financial data, the preparation of monthly reports, and the introduction to the accounting software used. Practice also learning the company's internal workflow, from the data collection process to the presentation of the final report to supervisors. The results obtained show that accuracy and timeliness in the preparation of financial statements are the key to achieving transparency and efficiency in the organization. In addition, this experience enhances the analytical and communication skills of Practice, as well as provides deeper insights into the challenges faced in the financial industry. Overall, this Professional Work program not only enriches the practical knowledge of Practice, but also establishes the work ethic and skills necessary to contribute effectively in a professional environment.
