### **PHYSICAL CHECKING PROCESS AT BADAN PEMERIKSA KEUANGAN REPUBLIK INDONESIA**

*The advancement and demands of the modern work environment require practical skills that go beyond mere theory. Direct experience in applying theoretical knowledge is essential to enhance individual competency. Universitas Pembangunan Jaya provide this opportunity to its students to gain real-world understanding through the Professional Internship Program. The intern conducted a professional internship at Badan Pemeriksa Keuangan Republik Indonesia (BPK-RI) within the Subdivision of State-Owned Asset Management. The primary task included conducting checking on physical asset within the central BPK-RI office and inputting data from the result of the physical check. This activity not only provided practical insight into the process of auditing physical assets but also honed the intern's skills in accuracy and precision that essential for asset management within a government administration. Through this experience, the intern gained valuable understanding of the importance of transparency and accountability in managing state assets, as well as the operational standards that apply within governmental agencies.*

**Keywords:** Professional Internship, Asset Checking, BPK-RI
