IMPLEMENTASI DAN INTERPRETASI DATA TICKETING SERTA KONDISI RUANGAN SERVER DALAM MONITORING DAN PENGAMBILAN KEPUTUSAN DI PT. CLIPAN FINANCE INDONESIA, TBK

PT Clipan Finance Indonesia, Tbk is a company engaged in the financial services sector, providing financial products and services such as investment financing, working capital financing, multi-purpose financing, and operating leases. The intern has been undertaking a Professional Work Experience at PT Clipan Finance Indonesia, Tbk from July 7, 2024, to October 7, 2024, for a duration of three months. The intern has been placed in the Information Technology & Management Information Systems department, specifically within the Information Technology division. The intern contributed to the development of data visualization using Superset tools for the Ticketing and Server Room projects. The Ticketing data visualization serves as a dashboard that displays visual representations of internal challenges faced by the company. The Server Room data visualization functions as a dashboard that presents the conditions of PT Clipan Finance Indonesia, Tbk's servers. Through these visualizations, it is hoped that users will find it easier to interpret information derived from the company's data. Additionally, the intern gained various insights, skills, experiences, as well as the ability to adapt and be responsive to changes in the industrial landscape. This professional work program plays a crucial role in preparing students to face the dynamic world of work, providing an understanding of a real working environment, and honing skills relevant to their field of study.
