### ***DEVELOPMENT OF A WEB-BASED APPLICATION FOR LETTER OF FINDINGS CLEARANCE USING PHP AT THE INSPECTORATE GENERAL OF THE MINISTRY OF RELIGIOUS AFFAIRS, INDONESIA***

*The Inspectorate General of the Ministry of Religious Affairs of Indonesia is an institution that plays a significant role in enhancing transparency and accountability within government operations. The intern undertook a professional internship at the Inspectorate General from July 1, 2024, to August 30, 2024. The intern was assigned to the Information Systems Division to develop features for a web-based application, specifically focusing on the management of the Surat Keterangan Bebas Temuan (SKBT) or Certificate of Findings Clearance. The developed features include submission, approval, data recording, and report generation for SKBT. In this project, the intern utilized PHP programming language and MySQL database. The internship provided valuable benefits, such as gaining real-world industry experience, enhancing programming skills, and deepening understanding of web-based system management.*

**Keywords:** *Web-Based Application, MySQL, PHP, Certificate of Findings Clearance*
