DEVELOPING MOBILE DASHBOARD WEBSITE 'Plat Merah USING LARAVEL IN MINISTRY OF FINANCE

This report is the result of internship that carried out by practitioners for three months at the Ministry of Finance, Directorate General of State Assets. During the internship, interns are placed in the Transformation and Information Systems division, which is one of the subdivisions in the Workplace. During the internship, the intern was involved in the "Plat Merah" mobile application project. This application itself is an application that will be launched by the Ministry of Finance for people who want to rent state-owned assets and use them for public needs. In the process, the practitioner was entrusted with working on a website dashboard page that uses the Laravel framework and functionally use to monitor orders coming from the mobile application. Starting from user needs, UI design, and implementation into a website. During internship activities, interns can complete all tasks given by the mentor within the time achieved.

Keywords : website, mobile application, framework, Laravel ,dashboard, Ministry of Finance.
