This research aims to analyze and provide empirical evidence regarding the influence of *Corporate social responsibility* (CSR), *Sustainability reports*, and *Capital Structure* on *Company Value*. The focus of this research is on banking companies listed on the Indonesia Stock Exchange (BEI) during the 2020-2023 period. The research sample was determined using a purposive sampling technique with certain criteria relevant to the research objectives.

The research method used is a quantitative method, which focuses on numerical data analysis to identify the relationship between the variables studied. The collected data was analyzed using Eviews statistical software, which allows systematic data processing and accurate hypothesis testing.

It is hoped that the results of this research can contribute to the development of theory and practice in the field of financial management and corporate governance, especially in the context of the banking industry in Indonesia. In addition, it is hoped that the findings of this research will provide insight for industry players regarding the importance of CSR, *sustainability reporting* and capital structure in increasing company value.

Keywords: *Company Value*, *Corporate social responsibility*, *Sustainability report*, *Capital Structure*, *Legitimation Theory*, *Signal Theory*
