DEVELOPMENT OF SECURITY CONTRIBUTION PAYMENT FEATURES ON THE KASUARI SECURE APPLICATION IN KASUARI BINTARO HOUSING

Research conducted in Kasuari Bintaro housing with the aim of developing a Security Fee Payment Feature on the Kasuari Secure Application by implementing SDLC (Software Development Life Cycle) as a reference in developing the system, with an approach through Waterfall Researchers conducted interviews with residents and also Kasuari housing administrators to find out the system needs and can be developed properly. The purpose of this study is so that security fee payments can be integrated through the Kasuari Secure application and housing administrators can manage security fee payments in just one download, through this development it is hoped that a faster and more transparent system can be created in paying security fees
