### **SUPERVISION OF FINISHING WORKS AT BINTARO JAYA XCHANGE 2**

The purpose for Internship activity is part of providing guidance to us so that we understand the aspects of outcomes in the world of architecture that are possible and can be used as observations of cases that often shown, then there are often discussions that are not necessarily present as discussions in academic study programs.

Certainly, what needs to be noted and taken into account is that the inherent context makes this information for this activity which is intended in the same learning in the architecture study program, although the meaning of architecture is very broad, but with the aim of including Internship activity in the public sector regarding its relationship with the field of architecture, it makes it Open context will be present beyond aspects related to the relationship of architectural areas only.

From work activities, the profession is carrying out activity as part of supervision on a particular field or building project. Field assignments are activities to observe the position and completeness of the building until the completion of the project period or time. So the building and its functional harmony are not able to meet the purpose of the building, so that the building remains functional.

Key Words : Supervision, Functional, Architecture and Building
