OVERVIEW OF RESEARCHER WORK PROCESS OF CREATING EDUCATIONAL CONTENT FOR 6 GRADE STUDENT AT PT DAPOER DONGEN NOESANTARA

In the world of education, there will always be learning through understanding theory and the application of theory or what is commonly called practice. These two things are reciprocal of one another. This makes the intern necessary to carry out practical learning by following Internship Program. Intern undertook KP at PT Dapoer Dongeng Noesantara and was placed as a member of the research team. Intern were asked to create educational content for grade 6 elementary school students. The educational content created needs to contain material content from Dapoer Dongeng production content which will be linked to the 2013 Curriculum material and psychological theories. This work is practicing to be able to think creatively and practice opportunities to put into practice the psychological theories that have been learned during the lecture.

Key Terms: Internship Program, Research, Educational Content, Elementary School, Dapoer Dongeng.
