### ANALISIS DAN IMPLEMENTASI PROSES BISNIS DALAM MODUL FAT (FINANCE, ACCOUNTING & TAX) PADA ODOO 17 PT. JAYA TEKNIK

*This report discusses the analysis and implementation of business processes in the FAT (Finance, Accounting & Tax) module on the Odoo 17 ERP system at PT. Jaya Teknik. The purpose of this activity is to understand the company's financial process flow and support the optimization of the implementation of the Odoo 17 system in supporting operational activities in the fields of finance, accounting, and taxation. In the implementation of the internship, the intern acts as a system support that supports the FAT module, with the main task of migrating data from Odoo 11 to Odoo 17, assisting users in the initial use of the system and conducting testing for the use of Odoo 17. The methods used include observation, direct participation in system implementation, and discussions with users and related IT team members. The results of this activity indicate that the use of Odoo 17 can improve the efficiency of financial recording, reporting accuracy, and ease of real-time transaction monitoring in PT. Jaya Teknik. In addition, the involvement of interns in supporting the implementation process provides practical experience in the use of ERP systems and a deeper understanding of business process integration in the company.*
