

ABSTRACT

The intern completed a professional practice program at PT Je Feriasthama, an architectural consulting firm focusing on architecture and interior design, with one of the main projects being the Taman Hiburan Rakyat (THR) Surabaya design competition. This project aimed to create an inclusive and interactive public space for the people of Surabaya, incorporating sustainable and eco-friendly design approaches. In this project, the intern was involved in site analysis, circulation planning, and concept development, emphasizing the integration of natural elements and accommodating social activities. This experience provided practical insights into the architectural design process of public spaces, highlighting the importance of collaboration and understanding the needs of both clients and the community.
