This study was conducted to determine the effect of Audit Committee, Independent Commissioner, Net Profit Margin, and Total Asset Turnover on Stock Prices in Energy Sector Companies in 2020-2024. This research utilized Eviews 13 software with a sample of companies obtained through purposive sampling, resulting in 165 observations from 33 energy sector companies over five years. The variables examined in this study include the Audit Committee (X1) and Independent Commissioners (X2), Net Profit Margin (X3), Total Asset Turnover (X4), and Stock Price (Y). The result of this study indicate that partially, Net Profit Margin and Total Asset Turnover have an impact on Stock Price, while the Audit Committee and Independent Commissioners don't have an effect on Stock Price. Simultaneously, the Audit Committee, Independent Commissioners, Net Profit Margin, and Total Asset Turnover have an effect on Stock Price.

Keywords: *Audit Committee, Independent Commissioner, Net Profit Margin, Total Asset Turnover, Stock Prices*
