### **IMPLEMENTATION OF SLAB AND BEAM ON CARTENSZ RESIDENCE APARTMENT PROJECT**

*In work, experience and insight are needed to be able to survive, so it requires student community service/SCS (Kerja Profesi) that is useful to provide opportunities for students to go directly into the work so that students can gain experience that will be very useful. Kerja Profesi started on June 16, 2020, at the Cartensz Residence Apartment project located in BSD, Serpong. In this project, PT Nusa Raya Cipta Tbk (NRC) is the main contractor. In the work, the practitioner is allowed to become a quality control that is responsible for controlling the quality of materials and directly controlling the implementation in the field. During the work, the practitioner studied the methods of casting plates and blocks on the project and learned how to solve problems that occur while doing the work.*

*Keyword : Construction World, PT Nusa Raya Cipta Tbk (NRC) , quality control*
