MOSQUE DESIGN PLANNING AND SPACE UTILIZATION, AT THE DESIGN CONTEST PROJECT

In the implementation of practical Professional Work doing professional work activities at Yeni Setiawan Architect, which is located on the design team. Practical scopes include 3D modelling of the interior of mosques, 2D working images, calculating RAB (Budget Plan) and preparing percentages in the form of posters and executive summary. During the implementation of Professional Work, practicing participated in the project of Office Design Competition with Tulang Bawang Barat and Godean Yogyakarta Main Market Design Contest. Lessons learned during the work of the project include, among others, how to place a space that fits its function into the building in order to be used properly. Taking into account the needs of the space and its breadth taking into account the comfort of the user.

Keywords: Contests, Space Programs, Planning.
