PRACTICE ANALYSIS OF PROVISION OF SOCIAL ASSISTANCE BY BANTEN GOVERNMENTS

The pandemic when Covid 19 was in a very crisis economy so that some workers had to be laid off and many companies went out of business due to the economic crisis, therefore the government provided social assistance to the community to overcome the economic crisis during this pandemic and there were some parties who only gave certain people and did not Average or fair and the excess of social assistance from the government is made inconsistent with the objectives in Article 24.

This research will follow up on some of the findings of previous studies regarding social assistance. This research wants to focus on the study of the pattern of analysis of the practice of providing social assistance by the Banten government in 2020. This research was conducted using a qualitative method by analyzing supported primary data, and conducting in-depth interviews with the required sources.
