*Children is a part of the world as the successor to future generations. Childhood is a phase in which a child experiences growth and development which determines the future. Education became crucial at that time, attention and affection from parents or family are the basic rights and needs of children to be properly fulfilled. This can be tampered if a child experiences sexual violence in his life and makes the child physically and psychologically injured. Children are vulnerable to becoming victims because they have a physical weakness and are still easy to influence but, we can prevent this by inserting good learning and advice so that they can distinguish between types of good and bad behavior. And can make them recognize the types of sexual violence as well as prevention and how to acknowledge it in the form of animated films that can make them understand better because there are examples and good visual forms so they can understand it easily.*
