Dogs are often chosen as pets by many people. Loyalty is the symbol often depicted from this animal. In addition, dogs have a warm and cheerful demeanor that many people love. In the Jakarta area itself, there are many dog owners. With so many people having dogs as pet, there must be a problem. One problem that is often encountered is in malls, especially the Central Park Mall. They have a dedicated park for dogs to play and walk inside the mall area. This sparks the problem for uneducated dog owners to leave their pet inside their cars afterwards for they aren't allowed to bring their pets in the mall building. Although only temporarily, leaving dogs inside a hot car can bring unwanted harms to the pet. An idea came up to the mind to minimize and eradicate this problem, which is to make a special kennel bag that is modular, with its own dedicated deposit storage unit. This idea aims so that dog owners could enter the mall building after walking their dogs without leaving them inside a hot car.
