*Ruang Publik Terpadu Ramah Anak (RPTRA) is one type of public space characterized by public open parks, green open parks, interesting games for children and children's development, social activity facilities, and PKK. Some evidence suggests that community participation improves social welfare both among adolescents and adults. South Jakarta that became the first target since the initial construction of the RPTRA. RPTRA South Jakarta the first target has achieved the best RPTRA performance. Social welfare can be improved because there is a good sense of community. This study aims to see the influence of community feelings on social welfare among residents who use the Ruang Publik Terpadu Ramah Anak (RPTRA) in South Jakarta. This research was using quantitative methods with simple regression analysis. The subjects of this study were 350 residents who used the Ruang Publik Terpadu Ramah Anak (RPTRA) in South Jakarta. The result of the analysis shows that there is a significant, positive and large influence, the great sense of community influence on social welfare is 40,7% while 59,3% is influenced by other factors. Thus, it can't be ignored that there is an influence of a sense of community on residents who take advantage of RPTRA in South Jakarta.*
