### **THE EFFECT OF FURNITURE LAYOUT IN CREATING A SPACE ATTEMPT**

Practitioners carry out professional work activities at PT. Karya Plus (Sca.la Design) balcony with other practitioners. The activity was carried out under the supervision of Principal Architect Hans Ramadiansyah. During these professional work activities, the practitioner plays a role in helping create interior design concepts in the form of layouting, custom furniture design and making working drawings on 3 projects, including; depiction of living room furniture at the PERO Indonesia store, renovation of S-Villa and renovation of the interior of the Office of Management. Practitioners are given responsibility for making daily reports and updating the design progress every day on each ongoing project. Practitioners with two other practitioners get additional tasks such as helping them learn to classify types of sample materials; calculating the volume of buildings and materials, using Autocad, SketchUp, PhotoShop and V-Ray applications; making furniture layout designs, and making furniture designs. (custom). During Professional Work activities carried out during the Covid-19 pandemic, PT. Balkon Karya Plus (Sca.la Design) implemented 80% Work From Office (WFO) and 20% Work From Home (WFH) with an agreement that had been determined by the work supervisor. office. During Work From Office (WFO) activities, the practitioner meets with clients, conducts direct project surveys and collects direct assistance and progress. Meanwhile, during Work From Home (WFH) activities, the practitioner coordinates the design team with clients online via Zoom and collects assistance and design progress through Servers, Whatsapp groups, We Transfer and Email.
