ARCHITECTURAL DESIGN ON OBJECTS: WAREHOUSE AND APARTMENTS IN AEROPOLIS AREA

Professional work practices are carried out at PT. Perkasalestari Permai which is in the area of development of the area containing offices, hotels, residential, retail, warehousing, commercial, and retail. In this company, the practitioner serves as an Intern Architect who helps the Assistant Project in making the required architectural plans. In practice, the practitioner is responsible for making alternative designs in 3D. As for the production of drawings submitted by external supervisors, namely, planning plans, drawings of planning pieces, looks, planning details, interior and exterior 3D. In this planning project, the practitioner is involved in; 8x12m warehouse design, 9x30m warehouse design, Lucent Residence Apartment interior design, Field Work (Final Check sanitary, walls, floors, ceilings), 9x30m Facade design, 4.5Ha area design and practical material on making S-Curve.

In the implementation of this professional work, the practitioner is planned to do work from office (WFO) while the implementation of this professional work still pays attention to the Health protocol. However, in the middle of the time, the practitioner requires to work from home (WFH). When working from home (WFH), the practitioner uses the Microsoft Teams and Zoom platforms to facilitate coordination with external supervisors, sending final planning files, and assisting with supervisors.

Keywords: *Planning, Image production, Implementation.*
