EMPLOYEE DATA ANALYSIS FOR PT OTO MULTIARTHA

In this era of the Industrial Revolution 4.0, many things have changed significantly due to the influence of technology, especially in the industrial sector. Technology makes everything fast and instant, such as accelerating data management, especially databases. In managing the database, the company uses information technology to facilitate management. This can make productivity in the company increase.

PT Oto Multiartha is a private institution engaged in finance with a focus on automotive services. To increase production, PT Oto utilizes Information Systems knowledge in managing its database. This is believed to be able to have a good effect on increasing company profits and improving services for consumers. Therefore, the practitioner carries out professional work activities at PT Oto Multiartha to take part in the management of the required database and to increase insight and experience in the world of work.
