AT PT SARWA MANGGALLA RAYA, ACTIVITIES FOR PROCESSING PURCHASE AND RENEWING MERCHANTABILITY.

The advent of Covid-19, which has surprised Indonesia, has increased the need for pharmaceuticals among Indonesians. As a result, it motivates pharmacists to put in extra effort in drug procurement. PBF (Big Pharmacy Trade) is a distribution system that sends drugs to pharmacies, who subsequently sell them to customers. Covid-19 has made it difficult for anyone to leave the house. As a result, various inventions have evolved, allowing people to continue to meet their needs at home. E-commerce is a user-friendly platform that everyone may utilize. They can be acquired through the E-commerce site for everything from needs to wants, including pharmaceuticals. To be able to fulfill the needs of the necessary medicines, it is simple, quick, and does not require leaving the house.

Keywords: Covid-19, E-commerce, Medicines.
