### **MONEV KPI APPLICATION DEVELOPMENT**

*In Professional Work activities, practitioners have the opportunity to carry out Professional Work activities in the LPMU unit at Pembangunan Jaya University (UPJ). Practitioners carry out professional work activities from June 21 to June until August 31, 2021, but guidance to the LPMU still work until September 16, 2021. The work carried out by the practitioner in this activity is to build a website-based application to carry out monitoring and evaluation (MONEV) activities for all units and study programs at UPJ. So far, the LPMU unit has had difficulties in carrying out monitoring and evaluation activities, because the LPMU unit does not yet have an effective system to carry out monitoring and evaluation activities. During the Professional Work activities, the practitioner succeeded in creating a website where users could see KPI plans, input KPI achievements, and admins could add KPI plans, and see KPI achievements achieved by each unit and study program at UPJ. After carrying out professional work activities, the practitioner is able to explore programming skills, communicate with the company, and complete work on time.*
