FRONT END DESIGN OF MONITORING AND EVALUATION REPORT APPLICATIONS FOR UNIVERSITY QUALITY ASSURANCE INSTITUTIONS (LPMU) AT UNIVERSITY PEMBANGUNAN JAYA

Monitoring and Evaluation Report Application Design is an application that is expected to make it easier for its users to report all certain activities related to the Work Unit or Departement at the University Pembangunan Jaya. The purpose of this application is to make it easier for Work Units or Departement to be connected to each other in carrying out certain activities which are certainly interconnected, both between Work Units and other Study Programs. One example is to report problems that are happening and of course there is a follow-up plan that will be used as a solution for the problem itself.

Keywords: *Design, reporting, monitoring, and evaluation.*
