Many still do not realize the importance of studying the history of the development of piano music, especially piano students and teachers. History The development of the piano through several ages from the Middle Ages, Renaissance, Baroque, Classical, Romantic and Modern. These periods have their own characteristics and characteristics in every song that is created. Lack of knowledge of the history of the development of piano music greatly affects the piano learning process for students and teachers. By studying the history of the development of the piano, every piano student or teacher will be more sensitive to how to play a song at a certain period. So that the game of a song will be played correctly and according to a certain song period. One of the things that can be done to provide education on the history of the development of piano music is to use digital books which are the easiest media to be accessed by anyone. With an all-digital situation, the use of gadgets plays a very important role in the learning and teaching process. Learning the piano has also started to use a lot of gadgets from applications or face-to-face using the phone with videos with the piano teacher during the learning and teaching process. Digital books also make it easier for piano students to be able to learn anywhere and anytime using their gadgets.
