Bicycles is a vehicles that are still used until today. Recently cycling is very popular especially during a pandemic. In addition, there are many benefits of cycling in everyday life, such as reducing pollution to avoiding traffic jams. Currently, many bicycle communities are campaigning to use bicycles at work. This community is a bike to work, which currently has a lot of fans. In the Bintaro area, precisely on Jalan Boulevard Bintaro, there is already a bicycle lane that supports the activities of cyclists, this track is known as the Binloop which surrounds Boulevard Bintaro.

In this case, we will discuss the bicycle lanes on Boulevard Bintaro, with a track starting from Segment 6, precisely in front of the Pondok Aren Toll Road, to Bintaro Xchange. Researchers will discuss the characteristics of bicycle users on Boulevard Bintaro as well as discussing the convenience factor of the Boulevard Bintaro bicycle path.

Keywords: *Bicycle lane, Convenience, Characteristics, Community.*
