

ABSTRACT

IMPACT OF FLOOD PROGRAM CONDITIONS ON THE QUALITY OF THE ENVIRONMENT AND BUILDING IN CILEDUG INDAH, TANGERANG

Tanti Harsiningsih

Student of Architecture Study Program, Pembangunan Jaya University

Ciledug Indah housing is one of the housing areas that are often flooded in the Tangerang City area. One of the factors causing this housing to be frequently flooded is the location of this housing on the banks of the river is river that is connected to river in the Bogor area. So, every rainy season, this river often gets delivery water from Bogor. Thus, this residential area will experience a major impact due to frequent flooding. This research was conducted to find out and analyze how the environmental conditions and the quality of buildings are often affected by flooding in Ciledug Indah Housing. As well as how residents adapt in dealing with these conditions. Thus, it can show results in the form of impacts on environmental conditions and the quality of buildings which are influenced by areas that are often affected by flooding.
