VISUALIZATION MAKING IN THE FINAL DESIGN PHASE AT ATELIER BAOU USING PLUG-IN V-RAY AND ARTLANTIS SOFTWARE

For three months of internship at Atelier BAOU under the guidance of principals and staff, intern worked as an assistant and observer of several designs or as an Intern Architect. During the event, intern also worked on various projects, such as the interior for FY House, the interior for Cliegon Housing Complex, the interior for Lobby in MaxOne Papua, the garden for AB House, the facade for TB House, and Nurul Jannah Mosque. As for the several projects mentioned, intern field of work is also to make 3D Modeling for creating a visualization image in every project that the writer do.

In the process, intern uses SketchUp for modeling, and two other different software for visualization making, depending on the needs. For the interior use V-Ray and for the exterior use Artlantis.

Keywords: *Visualization, Software, V-Ray, Artlantis*
