APPLICATION OF TECHNOLOGY-BASED ACCOUNTING INFORMATION SYSTEMS ON FINANCIAL RECORDING SYSTEMS AT GLOBAL JAYA SCHOOL

While carrying out Professional Work (KP) at Global Jaya School, Practitioners are placed in the Accounting & Finance Dept. by working under the guidance of the Accounting Staff and the supervision of the Finance & Accounting Manager. Practitioners have the opportunity to assist accounting staff in inputting financial transactions, bank reconciliations and employee receivables as well as filing company financial documents (filling). The implementation of the work that the practitioner does using Ms. Excel and School Edge which are special Accounting Information Systems owned by the company. The obstacles faced are derived from the accounting system used, such as the loss of transactions and the maximum nominal transactions that can be inputted into the system. These constraints must have been properly communicated to superiors to minimize the emergence of misunderstandings. well communicated to avoid misunderstandings. Global Jaya School, has implemented a computerized system in the process of recording financial transactions well even though the application used still needs some improvements. All transaction proof documents at this company have complete copies and are neatly archived in one place.
