STANDARDIZATION OF HUMAN COMFORT RELATED TO OFFICE INTERIOR FURNITURE

In carrying out professional work at Bagas & Associates for three months, the practitioner works under the Junior Architect. Practitioners are working on several projects, including two major projects, such as the GoWork Tower Rajawali Office Space Project and Bank Mandiri Bintaro Jaya. The scope of work on this project refers to the layout of the room layout and the Standardization of Interior Furniture Working Drawings. The final result of the learning during Professional Work that the practitioner gets is being able to understand how the layout of the room layout and the provisions for standardizing furniture working drawings for a room. Because a room cannot be separated from furniture, and the suitability of furniture to the room becomes a link to achieve a user's comfort in the room used. This is the main focus for practitioners to study more deeply to be developed by other authors.
