### DESIGN AND BUILD STAGES IN THE SHIRAZ DESIGN PROYEK

During the implementation of professional practice at Shiraz Design (PT. Panen Sampoerna Internusa) Within 3 months, the practitioner works and is positioned as an architectural and interior designer. During the professional practice period, the practitioner does not only work on interior Projects, but also works on architectural Project such as renovation Project and exterior Project, as well as structures. However, the practitioner is focused on interior Projects whose design stages are Design and Build. Practitioners are also involved in conducting site surveys which add insight into the process of how design and build can run well during planning until the design is complete. Within a period of 3 months in professional practice, the practitioner also becomes aware of the importance of the function of everything that is designed in the Project.
