### **INVOICE ISSUANCE PROCESS FOR BUDGET PLANNING BILLING ON PT SUN KARYA INDONESIA CUSTOMERS**

Teaching and learning activities within the University are not enough to necessarily equip students for the more challenging professional world of work. Therefore, work experience is needed to support future students' careers. To improve the quality of its students, Universitas Pembangunan Jaya (UPJ), as an educational institution, opens opportunities for its students through Professional Work or Kerja Profesi (KP) activities. Practitioners carry out professional work for 400 hours at PT Sun Karya Indonesia (SKI), a construction and interior design company. The great enthusiasm of the Indonesian people towards the world of interior design and civil society has encouraged the establishment of SKI. During the professional work practice, the practitioner has several jobs related to Invoice Issuance, including Purchase invoices, Sales Billing invoices, recapitulation of invoice document numbers that will be issued, and daily invoice recapitulation. The implementation of the invoice issuance for billing the budget plan to PT Sun Karya Indonesia's customers is quite good because the company's enterprise resource planning (ERP) system has been implemented optimally. Where the ERP system used by the company is an accounting information system in the form of cloud-based accounting software such as the Mekari Journal. Practitioners gain much new knowledge when carrying out all the tasks assigned by PT Sun Karya Indonesia.

**Keywords:** Purchase Invoice, Sales Billing Invoice, Accounting Information System
