ABSTRACT

Abraham Renaldo Epafroditus Tukirman (2019071001)

Implementation of The Laravel 8 Framework on The Website of The Directorate of SMA Kemdikbudristek.

In carrying out professional work in the Directorate of High School, Ministry of Education, Culture, Research and Technology (Kemdikbudristek) institutions, the student has worked under the supervision and mentored by the work supervisor. Student have had the opportunity to carry out professional work activities at the Digital Transformation Sub-Pokja. Student have had the opportunity to participate and be directly involved in redesigning and adding features to the website of the High School Directorate, Kemdikbudristek. In working on the website, the practitioner has worked on the back-end using the Laravel 8 Framework and created a CRUD (Create, Read, Update, Delete) function. Student have learned a lot about how to process routes and controllers on back-end websites, experience in the industrial world, experience communicating with colleagues and mentors, managing and utilizing time better and not giving up easily against obstacles that student experience when working on a project.

Keywords*: Website*, *Back-end*, Laravel 8
