### ***PURCHASE INPUT PROCESS AND PRICE ANALYSIS OF PURCHASE OF PROJECT GOODS AT JAYA TEKNIK COMPANY***

*During profession work at PT Jaya Teknik Indonesia, the practitioner works in the estimator division. In the implementation of the Professional Work, the practitioner is given the responsibility to carry out data entry or inputting data on the purchase of goods purchased in a project and then entered and classified based on the type of goods, the year of the current project and the location of the ongoing project into a computer application, namely Microsoft Excel. In addition, the practitioner also analyzes the price of goods where the practitioner compares the prices of goods of the same type in different years so that the practitioner can analyze the factors or causes of the difference in the price of the goods. After the practitioner has finished analyzing, then the practitioner presents the results of the analysis to the senior manager by explaining it in detail so that the senior manager can easily understand the results of the analysis that the practitioner has done. Thus, the practitioner gains useful knowledge to be applied in the future.*
