### **TESTING APPLICATION PROJECT PROFITABILTY SYSTEM USER MANAGEMENT MODULE AT PT. GITS INDONESIA**

*PT. GITS Indonesia is a digital agency engaged in IT Consulting. The company's services include mobile app development, website development, app auditing, discovery & co-creation, and more. Enterprise solutions are created to help a client or business to grow. The company's clients or target market are government institutions and companies, regardless of the scale of their business, which require the use of information technology. The importance of profitability report for a company including PT. GITS Indonesia. However, the current problem is that it takes 7 days to process 1 month of data. While C-level or other roles require a profitability report in a short time. A lot of data from various sources is needed to make a profitability report (Airtable, Clockify, dan Jurnal.id). So an innovation was initiated by creating a special application to create a profitability report to shorten the monthly profitability report on a project called the GITS Project Profitability System (GPP System).*
