METHOD OF IMPLEMENTATION OF PILE CAP WORK ON PIK 2 TABERNACLE FAMILY PROJECT

Professional Work is an activity carried out by students to gain a broader and more complete understanding of the world of work. This activity also provides opportunities for students to analyze, identify and practice directly the stages and processes of the world of work. One of the functions of Professional Work is to assist students in overcoming, implementing and solving problems and obstacles that exist in the company and in the field, balancing the knowledge gained in lectures and the knowledge used can be used as material to be practiced in the world of work. Professional Work (KP) was carried out at the PIK 2 Tabernacle Church Project, Tangerang Regency. In carrying out professional work, the practitioner learns about the work of pile cap. The practitioner helps oversee everything from formwork, ironing, to casting.
