Pramudya Fikri Setiawan (2019071016)

3D PT.TELKOM LOGO DESIGN USING PYTHON PROGRAMMING LANGUAGE

Computer graphics is a computational science that focuses on creating desired objects using computers. Python programming language is an interpretive programming language that can be used on various platforms. Popular programming language because it is closely related to Data Science. 3D is a form of space that has dimensions of height, width and length. 3D objects can be created using the Python programming language because this programming language is interpretive. The practitioner uses the Python programming language to create a 3D logo. The reason for using the Python programming language is because the computer graphics course uses the Python programming language to create 3D objects. The Professional Work (KP) of the practitioner will take place from July 1, 2022 to September 1, 2022, which is located at PT. Telkom Indonesia.

Keywords: Computer Graphics, Python, 3D
