

ABSTRACT

Riyan Yazid Maulana Amarulloh (2019077003)

Website Based Competency Test Information System (SIUK).

During his internship at Pembangunan Jaya University in the Information and Communication Technology (ICT) unit. Student are given the task of developing one of the information systems used for the registration process for certification participants. This application was developed using the codeigniter 3 framework. Application data processing was developed using the CRUD (Create, Read, Update & Delete) method found on the user, training participant, competency, APL 2, and element menus. This application provides benefits for certification activity managers to monitor participant registration data.

Keywords : *Framework, Codeigniter 3, SIUK, Software Development*
