PENGEMBANGAN APLIKASI MY PRIDE DI PT JUKE SOLUSI TEKNOLOGI BERBASIS WEB

In this era, data is a very valuable asset. Every company, both large and medium to low, must have Staff data that supports the company's work. Each Staff has their own personal data which is stored by the company as a company archive. The number of Staff owned and the data of incoming and outgoing Staff are obstacles in collecting Staff data in the company.To support and maximize the company's needs in managing Staff data collection, PT Juke Solutions Technology has a web-based application called My Pride. The purpose of this research on a web-based application belonging to PT Juke Solusi Teknologi is to analyze the system, design the system and design the Staff interface. The method used in this research is the PIECES analysis method. Analysis of Performance, Information, Economy, Control, Efficiency and Service (PIECES) is a technique to identify and solve problems that occur in information systems.
