THE IMPACT OF WORKING DRAWINGS QUALITY FOR ARCHITECTURE PROJECTS

While attending an internship in PT. Bangun Gagas Karyatama (Bagas and Associates), intern do the tasks to complete and revise the working drawing also rendering 3D drawing on selected project, under the supervisor and guidance from the head of planning division. These projects are include TWC Manohara, company house of Bank Mandiri, rented house in Lenteng Agung, and the new office of Bagas and Associates. Intern learn about how to make a good working drawing quality. Intern fully realized there are several factors that must be considered to produce good working drawing quality. These factors are include not just how to harmonize the design for the interior and exterior, but also with the accuracy and the neatness on every drawing, and communicate frequently between divisions to minimalize the mistakes on selected drawing. From these three things, Intern fully realized that how important to pay attention is on every drawing that has been drawn, so that design that has been produced is not only good from aesthetics perspective, but also optimal from functional point of view.

Keywords: communicate, planning division, rendering drawing, revise drawing, working drawing quality
