ROLE OF 2D/3D DRAWING IN ARCHITECTURE DESIGN DEVELOPMENT

While internship in PT. Bangun Gagas Karyatama, intern did assignments under the guidance of planning division. Intern was given a chance to participate directly in some architecture design development projects. Intern was assigned to design hotel facility in TWC Manohara Borobudur project in the form of architecture drawing, preparing interior moodboard concept and making 3D. intern also involved in other projects such as skylight detail drawing and lighting rod installation in rumah dinas Bank Mandiri furthermore, intern helped making some furniture drawings of Bank BRI project. Intern got many knowledges and experiences in making architectural drawing and 3D model which made intern to be more professional.

Keywords: Developing, improving 2D drawing, making 3D model.
