

**ABSTRACT**  
**THE INFLUENCE OF LIQUIDITY RATIOS, SOLVENCY RATIOS, AND PROFITABILITY RATIOS IN PREDICTING THE FINANCIAL DISTRESS OF BANKING COMPANIES DURING THE PANDEMIC**

Andyka Poetra Irawan

Student of Accounting Study Program, Universitas Pembangunan Jaya.

This study aims to explain the liquidity ratio, solvency ratio, and profitability ratio in predicting the financial distress of banking companies during the pandemic. Banking companies listed on the Indonesia Stock Exchange (IDX) This study uses secondary data obtained from the financial statements of periode companies from 2018 to 2020 which are listed on the Indonesia Stock Exchange (IDX).

Used to predict financial distress conditions in 2018, 2019, 2020 The results of this study show that liquidity ratios, solvency ratios, and profitability ratios have a significant influence in predicting financial distress conditions that occur in all banking companies.

This research succeeded in proving the effect of profit in predicting financial distress conditions that occur in all banking companies.

*Keywords:* financial distress, liquidity, profitability, and solvency of the Company.
