"LEARNING OF FINISHING WORK (WALL, CEILING, FLOOR) IN PROJECT BUILDING AND COLLEGE OF JAYA DEVELOPMENT UNIVERSITY"

This Professional Work Report provides new experience for students, especially in the field of Architecture. The purpose of carrying out this professional work is to be able to apply the theories of planning and building construction, especially in supervising building *Finishing* work with *Monitoring* methods every day that are explored by students, after that the percentage of development results is applied to excel. During professional work students learn the work system so that later in professional work done, students can analyze and compare existing planning theories with the preparation of reports that have been done directly (Practice in the Field), besides this is done because so far students only tend to get the experience of planning science is only limited to theory, so that later it can be used by students to be a basis for criticizing the strengths and weaknesses that exist based on the science of planning that has been taught

In this professional work report, the author wants to share his experience while attending professional work. What is obtained and found in practical work in the *Administration and Lecture Building of Pembangunan Jaya University* on June 17 to August 22. From the results of this experience, the author can conclude that this professional work is very beneficial for students, especially students who are ready to enter the workforce. Various interesting knowledge and experience are obtained from this professional work.

Keywords: Finishing Building, Monitoring, Supervision
