Title: **USE OF THEME CONCEPT IN INTERIOR DESIGNS**

Interior design is a work of art, made by humans which is applied to an area of inner space in a building. Many people want the beauty created in their homes. From time to time the interior design itself is increasingly sought after by all circles. In making a design, a brilliant idea is needed so that the design work that we make can attract the attention of others who see and make other people interested in buying it. In its application to the building interior design has a concept of a variety of themes, such as modern, vintage, classic, futuristic, minimalist theme concepts and much more. Everything has characteristics and feelings of space that differ if applied to a room, the size of the room can also affect a design. Therefore we as designers must be smart in making these ideas. This report will further discuss the use of the theme concept in the design of interior design, especially the concept of modern, futuristic and vintage themes

Keywords :Interior design, Idea, theme concept
