THE ROLE OF ARCHITECTURE LABOR IN CONSTRUCTION PROJECT URBAN HEIGHT RESIDENCE APARTMENT

During the internship at PT. Brantas Abipraya (Persero), as the main contractor of Urban Height Residence Apartment's construction, intern was assigned to complete and revise architectural shop-drawing before it was approved and built. Intern became aware about the importance of architecture skills for architecture labor at a construction project. Beside of that, intern was also introduced with construction project's work mechanism, which include planning, calculating, until building development stage. Intern has learned many things about the use of architecture dicipline at working phase, and it's relationship among other's diciplines in coordinating a project.

Keywords: contractor, architecture labor, construction project, project coordination.
