PERANCANGAN INTERIOR YANG TANGGAP TERHADAP KETERBATASAN RUANG

In the implementation of professional work in the DJUHARA + DJUHARA, Practitioners works under architects and has the opportunity to participate in Bank Capital projects that involve interior design. The interior design that is practiced includes the distribution of space, the use of materials, furniture design, and other interior components such as lighting. In addition, the practitioner also learns the experience of designing in the limitations of space that affect the interior. Through the work of this profession, praktikan learns a lot about the process of designing the interior from design proposals to build the design in the real world.

Kata Kunci: *Interior, Space*
