IMPLEMENTATION OF CATALOG AND PAYMENT FEATURES IN THE COMPANY PROFILE SYSTEM AT PT ASERIES INFORMIX TECHNOLOGY SOLUTIONS

During the implementation of Professional Work at PT Aseries Informix Solusi Teknologi(Nakama.id), interns were placed in the IT division as Back-end Developer for 3 months starting from March 01 to May 31, 2023. During this period, the intern was given the task of developing a feature on the website which is one part of the company profile website. Intern used Bootstrap 5 framework as front-end, CodeIgniter 4 framework as back-end, and MySQL Database as data storage. In the process of developing features, interns get the opportunity to add insights such as expanding knowledge about various technologies used by companies and experience in working professionally as a form of preparation for interns to start a career in the world of work.
